

AMENDMENTS TO THE CLAIMS:

Please change the heading at page 63, line 1, from "**Patent Claims**" to
--WHAT IS CLAIMED IS:--

The following listing of claims will replace all prior versions of claims in the application.

Claims 1-6 (canceled)

-- Claim 7 (new): A triazolopyrimidine of formula (I)

in which

G represents optionally substituted mono- or polycyclic saturated, unsaturated, or aromatic heterocyclyl attached via a nitrogen atom that is in turn attached within the heterocycle to a further nitrogen or oxygen atom, wherein the heterocycle optionally contains one or two further oxygen, nitrogen, and/or sulphur atoms, with the proviso that no two oxygen atoms are directly adjacent,

R represents aryl that is optionally mono- to pentasubstituted, and

X represents halogen,

or an acid addition salt of the compound of formula (I) in which G represents optionally substituted mono- or polycyclic saturated or unsaturated heterocyclyl attached via a nitrogen atom that is in turn attached within the heterocycle to a further nitrogen atom, wherein the heterocycle optionally contains one or two further oxygen, nitrogen, and/or sulphur atoms, with the proviso that no two oxygen atoms are directly adjacent.

Claim 8 (new): A process for preparing a triazolopyrimidine of formula (I) according to Claim 7 comprising reacting a dihalotriazolopyrimidine of formula (II)

in which

R and X are as defined for formula (I) in Claim 7, and

Y represents halogen

with a heterocycle of formula (III)

G-H (III)

or an acid addition salt thereof,

in which G is as defined for formula (I) in Claim 7,

optionally in the presence of a diluent and optionally in the presence of an acid acceptor.

Claim 9 (new): A microbicidal composition comprising one or more triazolopyrimidines of formula (I) according to Claim 7 or an acid addition salt thereof and one or more extenders and/or surfactants.

Claim 10 (new): A method for controlling unwanted microorganisms comprising applying an effective amount of one or more triazolopyrimidines of formula (I) according to Claim 7 or acid addition salts thereof to the unwanted microorganisms and/or their habitat.

Claim 11 (new): A process for preparing microbicidal compositions comprising mixing one or more triazolopyrimidines of formula (I) according to Claim 7 or acid addition salts thereof with one or more extenders and/or surfactants. --
